

Child's Name: _____
 DOB: _____
 Agency ID Number: _____

**NC Child Service Coordination Program
 Preventive Health Services**

Instructions: Preventive Health Services (PHS) are addressed in Section 5.11 in the current DMA CSC Clinical Coverage Policy. This form is used to document that families have been informed of PHS. CSCs must also assess families access to PHS, using the Strengths/Needs Assessment, and develop a Care Coordination Plan if needs are identified and assistance is needed in accessing PHS. PHS should at least be addressed close to the following ages of the Health Check Periodicity schedule, which is: Newborn, 1 month, 2 months, 4 months, 6 months, 9 months, 12 months, 15 months, 18 months, 2 years, 3 years, and 5 years. The CSC should not schedule a contact with the family just to address PHS, but should incorporate PHS into contact with families. Families should be informed of PHS based on their need and their ability to absorb the information. It may too much to cover all aspects of PHS in one visit.

Bright Futures Family Tip Sheets and Bright Futures Nutrition Family Fact Sheets are excellent resource for addressing Preventive Health Services and can be downloaded free at <http://www.brightfutures.org/familymaterials.html>. The Bright Futures Nutrition Family Fact Sheets are available in Spanish. If other resources are used, they must be documented below.
